EDUCATION

Middle East Technical University, Ankara, Turkey

B.Sc.: Computer Engineering

Stanford University, CA, USA

STEAM research apprenticeship

Edgware Academy, London, UK

High school exchange program

GPA: 1.93

October 2021-Present

Fully funded merit-based scholarship

June 2020-August 2020

Merit-based scholarship

June 2019-August 2019

SKILLS

Programming Languages: Python, MySQL, C, C++

Technologies: HTML, CSS, Git, FastAPI

Software Tools: VMware, LaTeX, GitHub

Programming Environments: PyCharm, Visual Studio Code, Sublime Text

Languages: English-advanced, Kazakh-native, Turkish-advanced, Russian-advanced

INTERNSHIP EXPERIENCE

Back-end Engineer Intern | USAID, Remote

June 2023 – August 2023

- Led the development of a website for the USAID program WSpark, delivered the project two weeks ahead of the deadline.
- Developed and maintained the back-end infrastructure using Python, consistently meeting or exceeding performance standards by 20%, ensuring a seamless user experience.
- Designed and implemented database schemas, optimized queries, and maintained data integrity using MySQL, leading a 30% increase in platform reliability and performance throughout the internship.

Front-end Engineer Intern | Sharlau.kz, Remote

February 2023 – April 2023

- Successfully build a website for events in Almaty city, which resulted in a 25% increase in user engagement within the first month of launch.
- Played a key role in an agile team of 5 members, contributing to efficient project management and a 15% reduction in a development time.
- Delivered end-to-end solutions by creating browser-compatible pages using HTML5, CSS and React, leading 30% decrease in bounce rates.

PROJECT EXPERIENCE

CoNtrol-20 Intern Project | Collaborative

May 2020 – July 2021

- Led a team of 3 students in developing an autonomous system designed to track symptoms of coronavirus patients
- Constructed symptom indicator devices using Arduino, resulting in a 20% decrease in the risk of virus transmission to doctors and nurses.
- Implemented a push notification system via Firebase, ensuring timely alerts for healthcare providers, contributing to a 15% reduction in response time to patient needs.
- Secured approval and support from the Ministry of Healthcare of the Republic of Kazakhstan and obtained 1 million KZT in funding from the local municipality for further development.
- Successfully implemented 32 symptom-tracking devices as a pilot project at the Taraz city hospital

LEADERSHIP EXPERIENCE

American University in Bulgaria

Merit-based scholarship

Science and technology camp

May 2020

American University, Washington D.C., USA

42 fellows selected among 3300 applicants

Merit-based scholarship

Young Civic Leadership Summit

August 2023

Turkic World Technology Development, Ankara, Turkey

President of Rocket building team

May 2023-Present

TRAININGS

Internet of Things 2019 Certification, CISCO, 2019, London, UK

Web development, DARit, 2023, Almaty, Kazakhstan

Data Structures and Algorithms Coding Club, Neocoder, 2022, Bishkek, Kyrgyzstan
